

Servicing and Repairs

We offer fixed price servicing costs for different cycle types with a minimum Labour Charge of £15.00.

Puncture repairs are £12.50 and include a new inner tube if necessary.

We recommend a General Service every 12 months. Regular maintenance and servicing will reduce the risk of breakdown, reduce wear and extend the life of components, and above all will keep you safe.

Fitting of minor parts will be included in the service charge, i.e. tyres, brake pads and brake/gear cables. General Service costs and breakdown of work performed is outlined in table below.

GENERAL SERVICE			
Cycle Type		Service Cost	
Junior bike up to 20" wheels		£25	
Junior bike 24" wheels		£35	
Single Speed		£35
